What Is Velo? - full video [HERE](#)

ZenBusiness Velo® is a free AI guide built for entrepreneurs — not just those who have already formed a business, but anyone who's ever had an idea and wondered "where do I even start?"

- Velo is free for anyone. It lives inside the ZenBusiness mobile app and website. Users who create a free account (no credit card, just an email) unlock saved chat history and a personalized business blueprint.
- **Velo can help with:** Building a personalized business blueprint.
- **Velo is not:** Just a chatbot, Only for people who have a business already, A premium or paid upsell (it's 100% free), Generic AI advice.
- Does Velo replace human customer support?
 - **No, Velo does not replace human customer support.** While Velo acts as a personalized AI assistant to automate tasks, it works alongside human help. If you find yourself in a situation where something feels confusing or you require additional guidance, ZenBusiness provides access to **an award-winning support team that you can reach out to for expert assistance.**

The Message

"Building a business is complex. Velo is the guide that clears the path and makes sure you never face it alone."

Three Reasons to Believe — Lead with One, include it in your form

- ☐ **Personalized to You:** Velo adapts to your goals, pace, industry, and stage.
- ☐ **Does the Work For You:** Handles action like formation, EINs, annual reports, licenses, websites — filed, generated, and completed inside the platform.
- ☐ **Backed by Expertise:** Shaped by 11 years of real ZenBusiness customer data, nearly a million businesses, and connects to human experts.

Who you are and who you're talking to

- **PRIMARY (80% of your content):** The Dreamer & Planner (Still figuring out if the idea is real, doing everything themselves. They don't have a business yet).
- **SECONDARY (20% of your content):** The Active Entrepreneur (Already running a business, looking to reduce friction, stay on top of obligations).

Content Guidelines

- **SOW:**
 - 1x IG Reel OR 1x TikTok video (*Length: 0:15–0:30 seconds*)
 - 1x IG Story Sharing the Pos
- **The Hook:** Introduce ZenBusiness Velo® in the first 3–5 seconds.
- **Show the Product:** Use screen recording of the Velo dashboard or walk through the app on camera.
- **Required CTAs (Choose ONE):**
 - **App-Focused**
 - Get the ZenBusiness app and build your Blueprint today
 - Download the app to start your custom Blueprint
 - **Web-Focused**
 - Go to [ZenBusiness.com/velo](#) for your personalized Blueprint
 - Visit [ZenBusiness.com/velo](#) to start your Blueprint now
 - **Combined / Action-Oriented**
 - Start your personalized ZenBusiness Blueprint today

- **Tone:** Clear, relatable, and educational.
- **Scenarios:** Content should be rooted in real-world business operations and show how these tools streamline workflows.

Examples of creatives

Example #2 - Strong hook - [The #1 Reason people never start their dream business](#)

Example #3 - [Product powered by AI x your story](#)

Dos and Don'ts

DO	DON'T
• Name the product as ZenBusiness Velo® early. • Show the app or website in use. • Emphasize that Velo is free. • Follow Meta ad safe zone guidelines.	• Refer to it as just "ZenBusiness" or only "Velo". • Lead with LLC formation. • Make it feel like a sales pitch. • Post without brand approval.

Approval Process

1. Submit [Concept](#) > 2. Shoot Draft > 3. ZenBusiness Reviews > 4. Final Sign-Off & Post (on or after June 23rd launch date).

Ready to submit your concept?

Use this [FORM](#) and your project manager will get back to you! We look forward to seeing what you'll create!

How to: Velo

Influencer Guide: How to Experience & Record Velo

Welcome to the ZenBusiness Velo campaign! This micro-guide will walk you through how to use the Velo mobile application and exactly what features to highlight in your content.

First, Download the app on [Android](#) or [Apple Store](#)

Golden Rule: Record from the Start!

Important: Please start recording your screen **from the very beginning**. We want to capture your genuine, raw reactions as you explore the initial setup, naming, and ideation phases. You do not need to be a tech expert or know prompt engineering to use Velo - just treat it like your personal 24/7 business consultant.

Step-by-Step App Walkthrough

Step 1: Dive In (No Account Needed Initially)

- **What to do:** Open the app and jump right into asking your burning business questions.
- **What to highlight:** Show your audience that you can use the app without even creating an account.

Step 2: Unlock Your Business Blueprint

- **What to do:** Sign up for an account to unlock the **Blueprint** feature. Watch the quick

introductory video that pops up to kick off the process.

- **What to highlight:** Note how creating an account allows Velo to learn about your business so it can give you highly personalized advice down the road (like tailoring insurance recommendations).

Step 3: Test Multiple Business Ideas & Get Cost Analyses

- **What to do:** Input specific industry preferences. For example, type in "food and beverage" and specify if you want an "online vs. offline" model.
- **What to highlight:** Show off how Velo spits out highly tailored business concepts (like a gourmet food truck). Take your followers through the generated revenue models, startup cost estimates, and risk assessments.
- *Pro-Tip:* Don't forget to show how easy it is to download these customized reports as a PDF!

Step 4: Name Your Business

- **What to do:** Use the business naming tool to brainstorm and check availability.
- **What to highlight:** Show the app running real-time checks to see if your business name is already in use locally, if the web domain is available, and if it clears nationwide trademark databases.

Campaign Content Focus

Keep your content hyper-focused on the **initial spark of starting a business**. Your videos should emphasize:

1. **Initial Ideation:** Coming up with the business concept.
2. **Business Naming:** Finding the perfect, legally available name.
3. **Cost Analysis:** Figuring out what it actually costs to get started.

(Note: You do **not** need to cover the final legal formation steps or filing paperwork - we are strictly focusing on the exciting, early exploration phase!)

Recording examples [HERE](#).

Q&A

- **What is Velo?**

Velo is ZenBusiness's AI Guide — a business success architect built to help entrepreneurs start, protect, and grow a company. It combines proprietary research, 850,000+ customer signals, and a proactive, action-oriented approach to turn starting a business into clear, manageable steps.

- **How is Velo different from ChatGPT or other AI chatbots?**

ChatGPT gives you generic answers. Velo gets work done. It's purpose-built for business owners, personalized to your state, industry, and stage, and wired into ZenBusiness services so it can actually file paperwork, flag compliance risks, and execute the next step — not just describe it.

- **Who is Velo built for?**

Velo is designed for aspiring and current business owners — people starting an LLC, running a side hustle, growing a small company, or navigating compliance. Whether you're in the Dream stage brainstorming an idea or in the Grow stage scaling operations, Velo meets you where you are.

- **What can Velo actually do?**

Velo helps you form your business, stay compliant, manage filings, estimate costs, identify required licenses, draft business plans, and plan next steps. It answers questions in plain language, surfaces what matters for your state and industry, and hands off to human experts when needed.

- **Is Velo free?**

Velo is included with ZenBusiness. You get access to Velo when you form your business through ZenBusiness or sign up for a ZenBusiness plan. There's no separate Velo subscription — it comes with the platform.

- **Does Velo give legal or tax advice?**

No. Velo provides general guidance and education, not legal or tax advice. For binding legal, tax, or compliance decisions, Velo points you to qualified professionals or ZenBusiness's partner services. Think of Velo as your informed guide, not your attorney or CPA.

- **How does Velo personalize its guidance?**

Velo adapts to your state, industry, business stage, and goals. It remembers context across conversations, tailors recommendations to where you are in the Dream, Plan, Start, Run, or Grow phase, and adjusts its tone to match how you communicate.

- **Can Velo help me form an LLC?**

Yes. Velo walks you through entity selection, state-specific requirements, naming, registered agent needs, and filing. When you're ready, ZenBusiness handles the actual formation paperwork, and Velo keeps you on track for what comes after — EIN, operating agreement, licenses, and compliance.

- **What is the ZenBusiness Blueprint for Success?**

The Blueprint is ZenBusiness's five-phase framework: Dream, Plan, Start, Run, and Grow. It organizes the full journey of building a business into logical stages, and Velo uses it to guide you through each phase with the right steps at the right time.

- **Can Velo help me stay compliant after I form my business?**

Yes. Velo tracks annual report deadlines, license renewals, and state-specific compliance requirements. It surfaces what's coming before it's due, explains why it matters, and connects you to ZenBusiness services to handle the filing for you.

- **Does Velo work in all 50 states?**

Yes. Velo supports business formation and compliance guidance across all 50 U.S. states, tailoring requirements, fees, and timelines to your specific jurisdiction.

- **How does Velo protect my business information?**

Velo operates within ZenBusiness's secure platform, following the same data protection standards used to handle business filings and customer records. Your information is used to personalize your experience, not sold or shared externally.

- **Can Velo help me write a business plan?**

Yes. Velo helps you draft a business plan tailored to your industry and goals, including market context, offerings,

financial thinking, and go-to-market steps. It turns the blank page into a structured starting point you can refine.

- **What if Velo can't answer my question?**

Velo is honest about its limits. When a question needs human expertise — legal, tax, or a specialized filing — Velo connects you to ZenBusiness's human experts or partner services. You're never stuck in an AI dead end.

- **How do I get started with Velo?**

Sign up with ZenBusiness or log into your existing account. Velo is built into the experience and ready to guide you from day one — whether you're forming a new business or managing one you already run.

Creators Guides

Allowlisting

Ad Codes (Instagram), Spark Codes (TikTok), and Partnership Ad Links (YouTube) are digital keys that let us boost your post as a paid ad so it reaches a massive new audience while keeping all the likes, comments, and views on your original video.

How to Find The Codes (2026 Update)

TikTok (Spark Ads)

1. **Enable Ad Settings:** Go to your profile → **three-line menu** → **Creator Tools** → toggle on **Ad Settings**.
2. **Authorize the Video:** Go to your video → tap the **three dots** (bottom right) → **Ad Settings** → toggle on **Ad Authorization**.
3. **Generate & Copy:** Choose the duration (e.g., 60 days), tap **Generate Code**, and then **Copy Code** to send to us.

Instagram (Partnership Ads)

1. **Label the Brand:** While posting (or editing), tap **Add Partnership Label** and tag our brand.
2. **Enable Ads:** In that same menu, toggle on **Allow Brand Partner to Promote**.
3. **Grab the Code:** Tap the **three dots** on your post → **Partnership Label & Ads** → tap **Get Partnership Ad Code** and copy it.

YouTube (Partnership Ads / BrandConnect)

1. **Link the Video:** Go to your **YouTube Studio** (Desktop) → **Content** → select your video.
2. **Request Access:** Scroll to the **Paid Promotion** section → click **Link Brand Partner**.
3. **Search & Send:** Search for our brand name to "Initiate Brand Partner Access." Once you hit send, the video is instantly ready for us to boost in Google Ads.

Why we use these codes

Instead of us re-uploading your content (which looks like a "fake" ad), these codes allow us to put the budget behind your **actual organic post**.

- **Social Proof:** All engagement stays on your profile.
- **Authenticity:** The post appears as a "Partnership" rather than a cold ad.
- **Growth:** You gain new followers from our paid targeting.

Platform Specifics

Platform	What HI will ask for	Where to look
TikTok	Spark Ads	Video → Ad Settings
Instagram	Partnership Ads	Post → Partnership Label
YouTube	BrandConnect	Studio → Paid Promotion

Metrics

 Instagram

Instagram's 2026 UI requires creators to expand the "Interactions" tab to see the full data set.

- **Navigate to:** Open the sponsored post/Reel → Tap the **View Insights** button (bottom left).
 - **What to Screenshot:**
 - **Reach Overview:** Ensure the breakdown of **Followers vs. Non-Followers** is visible.
 - **Conversion Bar:** Scroll down to **Profile Activity**. HireInfluence needs to see **Profile Visits** and **Link Taps** triggered by this specific post.
 - **Retention Graph (Reels Only):** Tap on **Watch Time**. Screenshot the "**Average Watch Time**" vs. the total video length.
-

 TikTok

TikTok Studio 2026 now separates "Viewer Journey" from "Viral Stats."

- **Navigate to:** Open the video → Tap **More Data** (bottom right) OR go to **TikTok Studio** → **Analytics** → **Content** → Select Video.
 - **What to Screenshot:**
 - **Retention Curve:** This is the graph showing the % of viewers still watching at the end. It is vital for proving the "Hook" worked.
 - **Traffic Source Type:** Ensure the **For You Feed**, **Search**, and **Personal Profile** percentages are visible.
 - **Engagement Ratios:** Screenshot the line showing **Shares** and **Saves**. In 2026, TikTok tracks "High-Intent Saves" (folders), which agencies use to predict sales.
-

 YouTube

For 2026, YouTube provides a "Brand Impact" card for sponsored content.

- **Navigate to:** YouTube Studio App → **Content** → Tap the Video/Short → **Analytics**.
 - **What to Screenshot:**
 - **Key Moments for Audience Retention:** This graph shows exactly where people stayed for the "Integrated Ad" or "Shoutout."
 - Show the **Impressions** and the **Click-Through Rate (CTR)**. This proves the thumbnail and title were effective.
 - **Audience "New Viewers":** Screenshot the "**New vs. Returning**" metric for this video to show how many new potential customers discovered the brand.
-

 Creator Best Practices for Screenshots:

1. **Wait 7 full days** post-upload so the "Delayed Reach" (common in 2026 algorithms) is captured.
2. **Include the Top Comments:** we ask for one extra screenshot of the top 3-5 comments if they show high purchase intent (e.g., "Just used the code!", "Is this available in blue?").
